# DATATEC ICON

## Function /

- Supports Commonrail Diesel Engines by Mobile App and Dash-mounted controllers.
   Can be turned On or Off. If Off, then the engine uses OEM factory settings.
- Has 3 modes

Mode 1 has a customized Map tuned for Economy or Load

Mode 2 has a customized Map tuned for Power

AI Mode uses Artificial Intelligence to learn your driving style
and adjust fueling via Injector Duration and Common Rail Pressure to best suit.

Benefits are lower fuel consumption, improved engine response or more power accordingly

Real-TimeTuning of

Commonrail Pressure Injector Duration vs Throttle position Boost

- Advanced Tuning Section users can increase or decrease injector duration by % via the mobile app Analysis graph.
- Display Gauges on mobile phone screen for

RPM Speed via GPS Boost Pressure in Bar, Volts, or Airflow g/s Commonrail Pressure in Volts, MPA or % of maximum Weather and Location display
